

# Folding Instructions for Road Bike

## CRANK

- Turn bicycle upside down and place pedals horizontally.
- Slide the Guard between the crank and the frame.
- Fold both side flaps inside. The rear facing side gets folded over the peddle.
- Fold top and bottom flaps to the middle and use the closing mechanism to secure the Guard.

## GEAR CLUSTER

- Slide the Guard behind the gear cluster and fold the side flaps to the center.
- First fold the side with the circular cut-out over the gear cluster, then repeat with the opposite side.
- Use the closing mechanism to secure the Guard.

# Folding Instructions for Road Bike

## DISC BRAKE

- Slide the Guard behind the disc brake and fold the side flaps to the middle.
- Fold the Guard over the disc brake and insert the pre-folded end from the opposite side between the Guard and the disc brake.

## DERAILLEUR

- Turn bike upside down.
- Feed the skewer through Guard. Round flap facing forward.
- Choose the right gear and place the chain over the Guard ring.
- Fold the sides in and secure with Velcro strap.
- Fold the top and bottom flaps and click in place.

# Folding Instructions for Road Bike

## FRONT SHOCK

- Turn bike upside down.
- Fold opposite sides of Guard inwards and interlock.
- Insert the end pieces into the precut holes
- Feed the skewer through the Guard and secure
